CEMEX LATAM HOLDINGS REPORTS
THIRD QUARTER 2017 RESULTS

- **Despite the lackluster demand for our products in Colombia, our cement prices bottomed out in July after almost a year of declines. Our cement prices in local-currency as of September were 2% higher than they were in June, as we continued with our Value Before Volume strategy in the country.**
- **Despite a decrease of US$43 million and US$101 million in EBITDA during the third quarter and first nine months of the year, our Free Cash Flow after total Capex only declined US$6 million and US$27 million, respectively, mostly because of lower strategic Capex, disciplined management of working capital, and lower financial expenses.**
- **We reached our lowest level of working capital investment during a third quarter, with minus 7 average working capital days. During this period our working capital investment remained in negative territory for sixth consecutive quarter.**

BOGOTA, COLOMBIA. OCTOBER 26, 2017 – CEMEX Latam Holdings, S.A. ("CLH") (BVC: CLH), announced today that consolidated net sales reached US$312 million during the third quarter of 2017, decreasing by 8%, in contrast with the same period of 2016. During the first nine months of the year consolidated net sales reached US$954 million, declining by 6% compared to those of the same period of 2016. These declines are mostly explained by lower cement volumes and prices in Colombia. As a result, operating EBITDA declined by 38% and 30% during the third quarter and the first nine months of 2017, respectively, compared to the same periods of 2016.

During the third quarter of 2017, our consolidated domestic gray cement, ready-mix and aggregates volumes were negatively affected by unusually rainy weather in Central America and weaker demand conditions in Colombia and decreased by 1%, 9% and 9%, respectively, compared to those of the third quarter of 2016. During the quarter our daily cement dispatches increased in Costa Rica, Nicaragua and El Salvador.

Jaime Muguiro, CEO of CLH, said, "Despite the significant efforts to manage the variables under our control, our results continued to be negatively affected by lackluster demand and intense competitive dynamics in Colombia, and by adverse weather conditions in our operations in Central America. However, after almost a year of declines in our cement prices in Colombia, we might have reached an inflection point. As of September, our cement prices were 2% higher than they were in June of this year"

CLH's Financial and Operational Highlights

- Our EBITDA was negatively affected as our cement prices in Colombia declined by 22% and 21%, in local-currency terms, during the third quarter and first nine months of the year, respectively, compared to those of the same periods in 2016.
- We might have reached an inflection point in our cement prices in Colombia. Although our cement prices declined in 3Q17, on a year-over-year and sequential basis, as of September they were 2% higher than in June of this year.

- For ninth consecutive quarter our cement volumes increased in our Rest of CLH region, on a year over year basis.
- Daily cement dispatches grew in Costa Rica for the second consecutive quarter, on a year over year basis.
- For sixth consecutive quarter, during the July-September period, our working capital investment remained in negative territory.
- Our Financial Expenses decreased by US$5 million during the quarter, versus those of 3Q16, mainly as a consequence of the refinancing agreement signed earlier this year.
- During the quarter our Total Debt was reduced by US$14 million, on a sequential basis.

Jaime Muguiro added, "Despite the headwinds we have faced in recent quarters in our operations, I am optimistic about the recent and encouraging developments with regards to our prices in Colombia, and our volumes in Costa Rica, which should allow us to continue with our Value Before Volume strategy in these countries, and which should impact positively our results in the upcoming quarters"

<u>Consolidated Corporate Results</u>

During the third quarter of the year, controlling interest net income reached US$28 million decreasing 34% compared to that of the third quarter of 2016.

Net debt was reduced during the third quarter of 2017 to US$881 million.

<u>Geographical Markets Third Quarter 2017 Highlights</u>

Operating EBITDA in **Colombia** decreased by 63% to US$22 million, versus US$60 million in the third quarter of 2016, with a decline of 18% in net sales reaching US$142 million.

In **Panama,** operating EBITDA decreased by 8% to US$30 million during the quarter. Net sales reached US$71 million in the third quarter of 2017, an increase of 1% compared to those in the same period of 2016.

In **Costa Rica,** operating EBITDA reached US$13 million during the quarter, decreasing by 6% on a year-over-year basis. Net sales declined by 2% to US$37 million, compared to those of the third quarter of 2016.

In the **Rest of CLH** operating EBITDA declined by 8% to US$19 million during the quarter. Net sales reached US$67 million in the third quarter of 2017, an increase of 5% compared to those of the same period in 2016.

CLH is a regional leader in the building solutions industry that provides high-quality products and reliable services to customers and communities in Colombia, Panama, Costa Rica, Nicaragua, El Salvador, Guatemala, and Brazil. CLH's mission is to create sustainable value by providing industry-leading products and solutions to satisfy the construction needs of our customers in the markets where we operate.

###

This press release contains forward-looking statements and information that are necessarily subject to risks, uncertainties and assumptions. Many factors could cause the actual results, performance or achievements of CLH to be materially different from those expressed or implied in this release, including, among others, changes in general economic, political, governmental and business conditions globally and in the countries in which CLH does business, changes in interest rates, changes in inflation rates, changes in exchange rates, the level of construction generally, changes in cement demand and prices, changes in raw material and energy prices, changes in business strategy, changes derived from events affecting CEMEX, S.A.B de C.V. and subsidiaries ("CEMEX") and various other factors. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. CLH assumes no obligation to update or correct the information contained in this press release.

Operating EBITDA is defined as operating earnings before other expenses, net plus depreciation and operating amortization. Free Cash Flow is defined as operating EBITDA minus net interest expense, maintenance and expansion capital expenditures, change in working capital, taxes paid, and other cash items (net other expenses *less proceeds from the disposal of obsolete and/or substantially depleted operating fixed assets that are no longer in operation). All of the above items are prepared under International Financial Reporting Standards as issued by the International Accounting Standards Board. Operating EBITDA and Free Cash Flow (as defined above) are presented herein because CLH believes that they are widely accepted as financial indicators of CLH's ability to internally fund capital expenditures and service or incur debt. Operating EBITDA and Free Cash Flow should not be considered as indicators of CLH's financial performance, as alternatives to cash flow, as measures of liquidity or as being comparable to other similarly titled measures of other companies.*

Shares outstanding are presented in millions.

Consolidated net sales during the third quarter of 2017 declined by 8% compared to those of the third quarter of 2016. For the first nine months of the year, consolidated net sales decreased by 6%, compared to those of the same period of 2016. These declines are mostly explained by lower cement volumes and prices in Colombia.

Cost of sales as a percentage of net sales during the first nine months of the year increased by 6.2pp from 51.0% to 57.2%, on a year-over-year basis.

Operating expenses as a percentage of net sales during the nine months of the year increased by 2.5pp from 21.8% to 24.2%, compared to those of the same period of 2016.

Operating EBITDA during the third quarter of 2017 declined by 38% compared to that of third quarter of 2016. During the first nine months of the year operating EBITDA decreased by 30%, compared to that of the same period in 2016. This decline is mainly explained by lower cement volumes and prices in Colombia.

Operating EBITDA margin during the third quarter of 2017 declined by 10.7pp, compared to that of the third quarter of 2016. During the first nine months of the year operating EBITDA margin declined by 8.6pp compared to that of the same period last year.

Controlling interest net income during the first nine months of the year reached US$79 million, declining 45% compared to that of the same period in 2016. During the third quarter of 2017 controlling interest net income reached US$28 million, declining by 34% compared to that of the third quarter of 2016.

Total debt at the end of the quarter reached US$922 million.

OPERATING RESULTS

Colombia

	January - September 2017	January - September 2016	% var	Third Quarter 2017	Third Quarter 2016	% var
Net sales	432	512	(16%)	142	173	(18%)
Operating EBITDA	83	176	(53%)	22	60	(63%)
Operating EBITDA margin	19.1%	34.4%	(15.3pp)	15.8%	34.9%	(19.1pp)

In millions of US dollars, except percentages.

	Domestic gray cement January - September	Domestic gray cement Third Quarter	Ready-Mix January - September	Ready-Mix Third Quarter	Aggregates January - September	Aggregates Third Quarter
Volume	(5%)	(4%)	(15%)	(16%)	(18%)	(21%)
Price (USD)	(18%)	(22%)	1%	(4%)	7%	5%
Price (local currency)	(21%)	(22%)	(2%)	(4%)	4%	5%

Year-over-year percentage variation.

In Colombia, during the third quarter our domestic gray cement, ready-mix and aggregates volumes declined by 4%, 16%, and 21%, respectively, compared to those of the third quarter of 2016. For the first nine months of the year, our domestic gray cement, ready-mix and aggregates volumes decreased by 5%, 15%, and 18%, respectively, compared to those of the same period of 2016.

Cement consumption during the quarter was affected by weak demand from industrial and commercial projects, as well as from high and middle income housing developments. Although our cement prices declined in 3Q17, on a year-over-year and sequential basis, as of September they were 2% higher than in June.

The deterioration in EBITDA during this quarter, on a year over year basis, relates mainly to lower cement volumes and prices, higher distribution costs due to the closure of our Bucaramanga plant, higher fuel costs, higher costs related to the scope of the maintenance of a kiln in our Ibague cement plant, as well as certain the one-off effects related to our housing solutions business, and the adverse arbitration decision of an electricity contract.

Panama

	January - September 2017	January - September 2016	% var	Third Quarter 2017	Third Quarter 2016	% var
Net sales	212	200	6%	71	70	1%
Operating EBITDA	87	90	(3%)	30	32	(8%)
Operating EBITDA margin	41.3%	45.3%	(4.0pp)	42.0%	46.4%	(4.4pp)

In millions of US dollars, except percentages.

	Domestic gray cement January - September	Domestic gray cement Third Quarter	Ready-Mix January - September	Ready-Mix Third Quarter	Aggregates January - September	Aggregates Third Quarter
Volume	5%	(3%)	16%	4%	18%	15%
Price (USD)	(1%)	(1%)	(0%)	0%	(3%)	(9%)
Price (local currency)	(1%)	(1%)	(0%)	0%	(3%)	(9%)

Year-over-year percentage variation.

In Panama during the third quarter our domestic gray cement volumes declined by 3%, while our ready-mix and aggregates volumes increased by 4% and 15% respectively, compared to those of the third quarter of 2016. For the first nine months of 2017, our domestic gray cement, ready-mix and aggregates volumes increased by 5%, 16%, and 18% respectively, compared to those of the first nine months of 2016.

Our cement dispatches in the country during the quarter and the first nine months of 2017 were driven by infrastructure works like the second line of the Subway, Minera Panamá, and the urban renovation of Colon city, as well as by middle-income and low-income residential projects.

Our margin decline of 4.4 percentage points during the quarter is mostly explained by lower cement volumes, a product-mix effect reflecting an increase in sales of ready-mix and aggregates, and an increase in our fuel costs

OPERATING RESULTS

Costa Rica

	January - September 2017	January - September 2016	% var	Third Quarter 2017	Third Quarter 2016	% var
Net sales	114	120	(5%)	37	38	(2%)
Operating EBITDA	40	49	(18%)	13	14	(6%)
Operating EBITDA margin	35.2%	40.7%	(5.5pp)	35.1%	36.8%	(1.7pp)

In millions of US dollars, except percentages.

	Domestic gray cement January - September	Domestic gray cement Third Quarter	Ready-Mix January - September	Ready-Mix Third Quarter	Aggregates January - September	Aggregates Third Quarter
Volume	(1%)	(0%)	2%	22%	28%	33%
Price (USD)	(8%)	(6%)	(15%)	(10%)	(52%)	(51%)
Price (local currency)	(4%)	(3%)	(11%)	(7%)	(49%)	(50%)

Year-over-year percentage variation.

In Costa Rica, during the third quarter our domestic gray cement volumes remained flat, while our ready-mix and aggregates volumes increased by 22% and 33%, respectively, compared to those of the third quarter of 2016. For the first nine months of the year our domestic gray cement volumes declined by 1%, while our ready-mix and aggregates volumes increased by 2% and 28%, respectively, compared to those of the same period of 2016.

Despite severe weather conditions during the quarter, we have seen positive signs with regards to demand for our products in the country. Daily national cement consumption increased during the July-September period for the second consecutive quarter, on a year-over-year basis, fueled by industrial and commercial developments.

Year to date, our operations in Costa Rica have had the highest alternative fuels substitution rate in our portfolio. This quarter it reached 27.8%, a new record for this operation, helping us partially offset the increase in fuel costs in the country.

Rest of CLH

	January - September 2017	January - September 2016	% var	Third Quarter 2017	Third Quarter 2016	% var
Net sales	215	197	9%	67	64	5%
Operating EBITDA	66	65	1%	19	20	(8%)
Operating EBITDA margin	30.4%	32.8%	(2.4pp)	27.9%	31.8%	(3.9pp)

In millions of US dollars, except percentages.

	Domestic gray cement January - September	Domestic gray cement Third Quarter	Ready-Mix January - September	Ready-Mix Third Quarter	Aggregates January - September	Aggregates Third Quarter
Volume	10%	7%	27%	20%	62%	2%
Price (USD)	(1%)	(1%)	(9%)	(4%)	(12%)	2%
Price (local currency)	(1%)	(1%)	(9%)	(4%)	(8%)	7%

Year-over-year percentage variation.

In the Rest of CLH region, which includes our operations in Nicaragua, Guatemala, El Salvador and Brazil, during the third quarter of 2017 our domestic gray cement, ready-mix and aggregates volumes increased by 7%, 20% and 2%, respectively, compared to those of the third quarter of 2016. During the first nine months of 2017, our domestic gray cement, ready-mix and aggregates volumes increased by 10%, 27% and 62%, respectively, compared to those of the same period of 2016. Despite the unusual rainy weather conditions in Central America in recent months, cement volumes increased for the ninth consecutive quarter in the Rest of CLH region in the July-September period, on a year-over-year basis.

In Nicaragua, infrastructure works continued to drive cement consumption. Although housing developments continue to demand our products, construction activity for new projects has slowed down.

With regards to Guatemala, construction activity during the quarter was affected by rainy weather conditions, and by the decrease in demand from two of the most important mining projects in the country. National cement consumption continues to rely heavily on private investment, mostly from industrial and commercial works. Construction of public works remains stagnant and with very low levels of disbursements.

DEFINITIONS OF TERMS AND DISCLOSURES

Methodology for translation and presentation of results

Under IFRS, CLH reports its consolidated results in its functional currency, which is the US Dollar, by translating the financial statements of foreign subsidiaries using the corresponding exchange rate at the reporting date for the balance sheet and the corresponding exchange rates at the end of each month for the income statement.

For the reader's convenience, Colombian peso amounts for the consolidated entity are calculated by converting the US dollar amounts using the closing COP/US$ exchange rate at the reporting date for balance sheet purposes, and the average COP/US$ exchange rate for the corresponding period for income statement purposes. The exchange rates used to convert: (i) the balance sheet as of September 30, 2017 and September 30, 2016 was $2,941.07 and $2,879.95 Colombian pesos per US dollar, respectively, and (ii) the consolidated results for the third quarter of 2017 and for the third quarter of 2016 were $2,957.80 and $2,965.17 Colombian pesos per US dollar, respectively.

Per-country/region selected financial information of the income statement is presented before corporate charges and royalties which are included under "other and intercompany eliminations."

Consolidated financial information

When reference is made to consolidated financial information means the financial information of CLH together with its consolidated subsidiaries.

Presentation of financial and operating information

Individual information is provided for Colombia, Panama and Costa Rica.

Countries in Rest of CLH include Nicaragua, Guatemala, El Salvador and Brazil.

Exchange rates

	January - September		January - September		Third Quarter

Amounts provided in units of local currency per US dollar.

DEFINITIONS OF TERMS AND DISCLOSURES

Definition of terms

Free cash flow equals operating EBITDA minus net interest expense, maintenance and strategic capital expenditures, change in working capital, taxes paid, and other cash items (net other expenses less proceeds from the disposal of obsolete and/or substantially depleted operating fixed assets that are no longer in operation).

Maintenance capital expenditures investments incurred for the purpose of ensuring CLH's operational continuity. These include capital expenditures on projects required to replace obsolete assets or maintain current operational levels, and mandatory capital expenditures, which are projects required to comply with governmental regulations or internal policies.

Net debt equals total debt minus cash and cash equivalents.

Operating EBITDA equals operating earnings before other expenses, net, plus depreciation and operating amortization.

pp equals percentage points.

Strategic capital expenditures investments incurred with the purpose of increasing CLH's profitability. These include capital expenditures on projects designed to increase profitability by expanding capacity, and margin improvement capital expenditures, which are projects designed to increase profitability by reducing costs.

Working capital equals operating accounts receivable (including other current assets received as payment in kind) plus historical inventories minus operating payables.

Exhibit 99.3

Forward looking information

This presentation contains forward-looking statements. In some cases, these statements can be identified by the use of forward-looking words such as "may," "should," "could," "anticipate," "estimate," "expect," "plan," "believe," "predict," "potential" and "intend" or other similar words. These forward-looking statements reflect CEMEX Latam Holdings, S.A.'s ("CLH") current expectations and projections about future events based on CLH's knowledge of present facts and circumstances and assumptions about future events. These statements necessarily involve risks and uncertainties that could cause actual results to differ materially from CLH's expectations. Some of the risks, uncertainties and other important factors that could cause results to differ, or that otherwise could have an impact on CLH or its subsidiaries, include, but are not limited to, the cyclical activity of the construction sector; CLH's exposure to other sectors that impact CLH's business, such as the energy sector; competition; general political, economic and business conditions in the markets in which CLH operates; the regulatory environment, including environmental, tax, antitrust and acquisition-related rules and regulations; CLH's ability to satisfy its debt obligations and CEMEX, S.A.B. de C.V.'s ("CEMEX") ability to satisfy CEMEX's obligations under its material debt agreements, the indentures that govern CEMEX's senior secured notes and CEMEX's other debt instruments; expected refinancing of CEMEX's existing indebtedness; the impact of CEMEX's below investment grade debt rating on CLH's and CEMEX's cost of capital; CEMEX's ability to consummate asset sales and fully integrate newly acquired businesses; achieve cost-savings from CLH's cost-reduction initiatives and implement CLH's pricing initiatives for CLH's products; the increasing reliance on information technology infrastructure for CLH's invoicing, procurement, financial statements and other processes that can adversely affect operations in the event that the infrastructure does not work as intended, experiences technical difficulties or is subjected to cyber-attacks; weather conditions; natural disasters and other unforeseen events; and the other risks and uncertainties described in CLH's public filings. Readers are urged to read these presentations and carefully consider the risks, uncertainties and other factors that affect CLH's business. The information contained in these presentations is subject to change without notice, and CLH is not obligated to publicly update or revise forward-looking statements. Unless the context indicates otherwise, all references to pricing initiatives, price increases or decreases, refer to CLH's prices for CLH's products.

UNLESS OTHERWISE NOTED, ALL CONSOLIDATED FIGURES ARE PRESENTED IN DOLLARS AND ARE BASED ON THE FINANCIAL STATEMENTS OF EACH COUNTRY PREPARED UNDER INTERNATIONAL FINANCIAL REPORTING STANDARDS.

Aggregates	Volume	-6%	-9%	-4%
	Price (USD)	-3%	-5%	5%
	Price (LtL_1)	-4%	-5%	4%

Our consolidated volumes for our three core products decreased during 3Q17, mainly resulting from weaker demand in Colombia and Panama, and unusual rainy weather in Central America

Our cement prices declined by 11% and 2% in 3Q17, in local currency terms[1], against those of 3Q16 and 2Q17, respectively, mainly as a result of intense competitive dynamics in Colombia

(1) Like-to-like prices adjusted for foreign-exchange fluctuations

	9M17 vs. 9M16	3Q17 vs. 3Q16	3Q17 vs. 2Q17
Cement	-21%	-22%	-2%
Ready mix	-2%	-4%	-1%
Aggregates	4%	5%	0%

National cement dispatches remain subdued.

We estimate that national cement demand decreased by 1.3% and 2.5%, in 3Q17 and 9M17, respectively, on a year-over-year basis

Possibly reached an inflection point in our prices.

Our cement prices in local-currency terms as of September were 2% higher than they were in June

The deterioration in EBITDA margin during 3Q17 vs. 3Q16

relates mainly to:

- Lower cement prices
- Lower demand for our products
- Higher distribution and fuel costs
- Higher maintenance costs
- Certain one-off effects related to housing solutions, and electricity

|| Colombia – Residential Sector

Central Government recently made changes in middle income housing subsidy program in an effort to boost construction, after several months of lackluster demand

Challenging economic conditions have affected middle and high income housing developments this year

Social interest housing has been the main driver of demand for this sector in 2017

Cement demand from residential sector is expected to decrease in the mid single digits during 2017

|| Colombia – Infrastructure Sector

Construction works from some 4G projects, which have secured financing, have started to demand cement, although at low levels.

Infrastructure works should drive cement demand in 2017, mainly as a consequence of:

- Initial works of 4G program
- Increased disbursements from the royalties fund
- *Vías de la Equidad* program
- Construction of public schools

Infrastructure developments in Bogota remain subdued. However, financing was recently secured to develop projects in the city in 2018 and onwards

Cement demand from infrastructure projects should grow ~2% in 2017

|| Colombia – First carbon-neutral fleet in the country

This achievement further demonstrates our effort, commitment, and responsibility to the environment, and is proof that at CLH we are building a better future

CEMEX Colombia received carbon-neutral certification for its entire fleet

Emissions of vehicles are offset by planting and maintaining approximately 480,000 trees
in Orinoquía, a post-conflict, and nature rich zone of Colombia

This forestry project will capture around 120,000 tons of CO_2, and protect the region's native forests

Cement	-1%	-1%	0%
Ready mix	0%	0%	2%
Aggregates	-3%	-9%	-3%

While our cement volumes declined, our ready-mix and aggregates volumes increased
during 3Q17,compared to those of 3Q16

During 1H17 we had a favorable comparison base in Panama
reflecting a low level of construction activity in 1H16

EBITDA and EBITDA margin declined during the quarter,
compared to those of 3Q16, mostly as a result of lower cement volumes, a product-mix effect, and higher fuel costs

|| Panama – Sector Highlights

Delays in new public projects could create a temporary decline in demand for our products, given the lackluster consumption from the residential and industrial and commercial sectors

Infrastructure works should continue to drive demand for our products in the country.

Unfortunately execution of new projects is taking longer than anticipated

Strong pipeline of infrastructure projects should be supported by Government revenues.

Potential investments of ~US$10 B from projects such as:

- 3rd line of the subway
- 4th bridge over the Canal
- The Corozal port
- Natural Gas plant (Isla Margarita)

Results Highlights Costa Rica

Costa Rica – Results Highlights

Financial Summary US$ Million

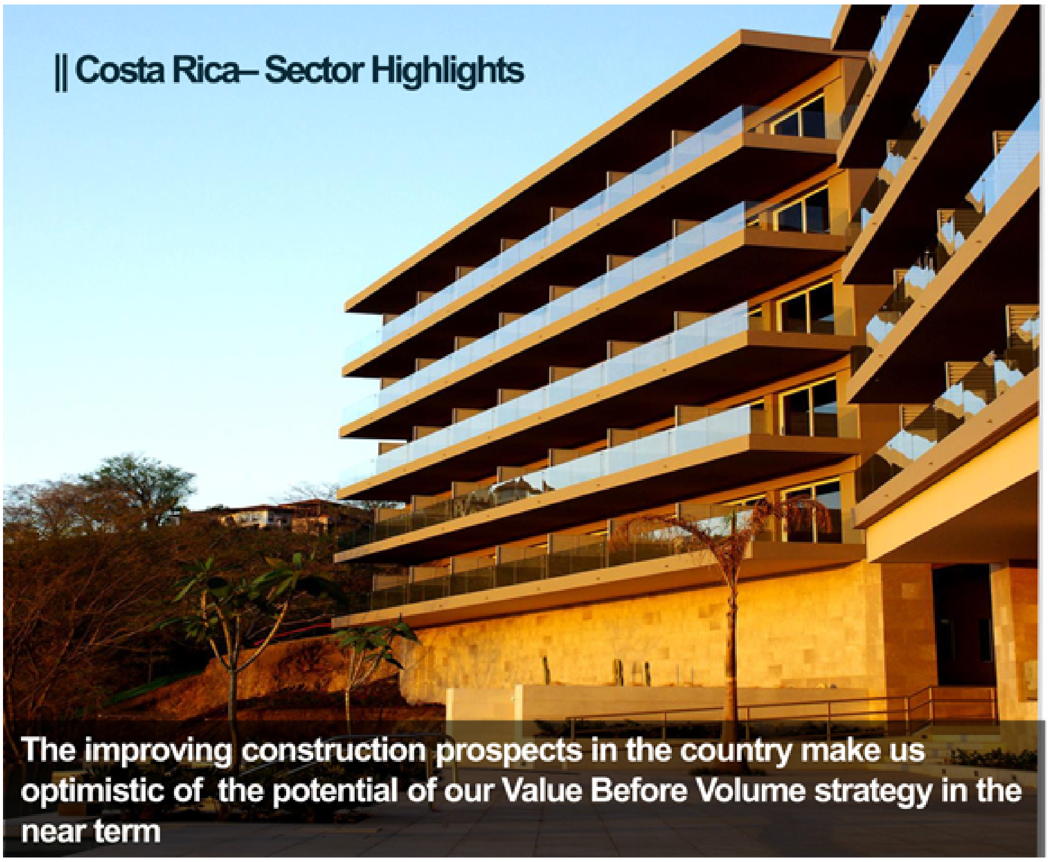
Ready mix	-11%	-7%	-4%
Aggregates	-49%	-50%	25%

Second consecutive quarter with growth in daily cement sales
on a year-over-year basis

Despite the unusual rainy weather during 3Q17, our ready-mix and aggregates volumes grew by double digit rates
versus those of 3Q16

EBITDA and EBITDA margin declined during the quarter,
compared to those of 3Q16, as a result of lower prices, a product-mix effect, higher fuel costs, and a provision for bad debt

|| Costa Rica– Sector Highlights



The improving construction prospects in the country make us optimistic of the potential of our Value Before Volume strategy in the near term

Demand for our products in upcoming quarters should be driven by the execution of :

- *Oxígeno* project
- Northern Beltway
- Route 32
- Hotels and warehouses
- Works in public universities

We recently secured most of the supply for *Oxigeno,* the biggest private project in the country

Potential demand could derive from efforts to repair local infrastructure damaged during the hurricane season

Cement	-1%	-1%	0%
Ready mix	-9%	-4%	9%
Aggregates	-8%	7%	24%

Our cement volumes grew in 3Q17 for 9th consecutive quarter, on a year-over-year basis, despite adverse weather conditions

In 3Q17 and 9M17 demand for our three core products grew vs. that of the same periods in 2016

EBITDA Margin declined 3.9pp in 3Q17 vs.3Q16, mostly explained by:
- Lower cement volumes in Guatemala
- Lower ready-mix prices in Nicaragua
- Product-mix effect reflecting higher ready-mix and aggregates volumes
- Product-mix effect related to higher volumes in El Salvador and Brazil

|| Rest of CLH – Nicaragua highlights

Our cautious view of the country remain given the increase vulnerabilities of the country's external accounts

Our cement volumes increased on a year over year basis despite severe weather in 3Q17

We estimate that construction of roads and hospitals, should drive demand for our products in the following quarters.

Construction works for new residential projects have slowed down in recent months

|| Rest of CLH – Guatemala highlights

National cement consumption was affected this quarter by rainy weather, and a decrease in demand from two mining projects

Our cement dispatches decreased by 11% and 10% during 3Q17,against those of 3Q16 and 2Q17, respectively

Residential, and industrial and commercial works continue to drive cement demand, whereas consumption from public works remains dull

- Strategic Capex	**30**	108		2	32	
Free Cash Flow	**46**	**73**	**-37%**	**17**	**22**	**-26%**

During 3Q17 and 9M17, while EBITDA declined US$43 M and US$101 M, FCF[1] only decreased US$6 M and US$27 M, respectively, mostly as a result of:

- Lower strategic Capex
- Lower Financial Expenses resulting from the debt refinancing
- Lower cash taxes
- Sales of idle and non-core fixed assets

Net debt was reduced during 3Q17 to US$881 M
